

# Clover™ Query real-time System i Web Reports & Queries

Save money - Have all the users you want build and run web reports to drive business decisions!

Clover is a System i Web Query and Business Intelligence tool that lets **unlimited end users and IT personnel** design and run real-time web reports and queries deployed in browsers. Create reports and graphs in minutes using the Clover Query templates. Unlock the power of Clover's full web development capabilities by creating sophisticated real-time queries and reports, executive dashboards with drill downs, and ad hoc reports. Plus, you'll save lots of money too, because Clover includes an **unlimited user license and 25% discount**.

Clover Query with totals, level breaks, drill downs, export to Excel & multi-series charts. Try this real-time query online at [www.BCDSoftware.com/demo](http://www.BCDSoftware.com/demo)

Executive dashboards, prompts, KPIs and gauges. View this sales dashboard example at [www.BCDSoftware.com/demo2](http://www.BCDSoftware.com/demo2)

## Clover Query Benefits

- ✓ **Save money.** Unlimited Users and 50% off discount.
- ✓ **Runs in a browser** with No client side software needed.
- ✓ **Cut costs** by reducing paper based report printing.
- ✓ **Improve decision making** process by unlocking hard to access information and creating Executive Dashboards.
- ✓ **Reduce demand on IT** by empowering end-users.
- ✓ **End user report generation** is simplified using pre-defined queries and parameterized ad hoc reports.
- ✓ **Free SmartCharts** for graphical representation of data.
- ✓ BCD offers **excellent support**.

**Clover includes unlimited users & developers**

**Save a lot of money.** If you have 6 or 600 users who need to view or create reports, the cost is the same!

## Secured and Organized Access to Reports

Use Free\* Nexus Portal to provide a secure, point of access to your organization's reports and queries where they can be organized into menu trees, folders, portlets and dashboards for quick retrieval. Use *authority lists* so users only access authorized reports, queries, web menus, dashboards and more.

\*License fee waived, maintenance only.
